

PROHIBITION OF SALES TO EEA RETAIL INVESTORS - other than with respect to offers of the Notes in Finland during the period from and including 17 June 2021 to and including 2 August 2021, the Notes are not intended to be offered, sold or otherwise made available to, and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; of (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (the "**Prospectus Regulation**"). Consequently, save as provided above, no key information document required by Regulation (EU) No. 1286/2014 (as amended, the "**PRIPs Regulation**") for offering or selling the Notes or otherwise making them available to any retail investor in the EEA has been prepared and therefore offering or selling the securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIPs Regulation.

4. Information relating to Reference Entity/Entities, explanation of effect on value of investment and associated risks and other information concerning the Reference Entity/Entities:

The return on the Notes is linked to the credit risk and the financial obligations of the underlying Reference Entity (which shall include any Successors thereof). The creditworthiness of the Reference Entity may go down as well as up throughout the life of the Notes. Fluctuations in the credit spreads of the Reference Entity will affect the value of the Notes.

The Adjusted Calculation Amount will be adjusted based on the number of Credit Events. If 9 or less credit events occur the Adjusted Calculation Amount will be equal to the original Calculation Amount. For each Credit Event above 9 the Adjusted Calculation Amount will be lowered by 1/9 meaning that at 18 or more Credit Events the Adjusted Calculation Amount will be equal to 0% (zero). In a worst case scenario where 18 or more Reference Entities experience a Credit Event during the first Interest Period, the Final Redemption Amount will be zero and the investor will lose all of the invested amount.

Details of the past performance of the entities comprising the Itraxx® Europe Crossover Series 35 Version 1, which determined the initial Reference Entities as mentioned in the Table hereto, can be found on the website address www.markit.com and more specifically under "Products & Services" and "Indices". The Issuer does not intend to provide post-issuance information.

5. Performance of Basket of Underlying Equities, explanation of effect on value of investment and associated risks and other information concerning the Basket of Underlying Equities:

The investor is exposed to the development of the Underlying Equities. The notes are a complex financial product with potentially full down side risk.

The performance is determined as the weighted average performance of the Basket of Underlying Equities, multiplied with the Participation Rate of INDICATIVELY 160% per cent (to be determined no later than on the Issue Date, subject to a minimum of 150 per cent.).

If the weighted average performance of the Basket of Underlying Equities is positive, the Notes will redeem at a price above par.

If the weighted average performance is negative, the Notes will redeem at par.

The market value of the Notes during their term may fluctuate and if the Notes are sold in the secondary market prior to maturity they might have to be sold at a substantial loss. Investors should therefore be willing to hold the Notes to maturity. Investors cannot be certain that there will be a secondary market for the Notes and the Notes are not expected to be traded every day. Even if such a market did exist, there is no assurance that the market would operate efficiently, or that the price of the Notes would reflect a theoretical or fair price.

If the Issuer is obliged to redeem the Notes early, due to change in Tax or Legal aspects prohibiting the Notes, or in the event of the Issuer defaulting on its debt, the Notes may be redeemed in accordance with the Conditions at their Early Redemption Amount (see item 32 of the Final Terms). If the Notes are redeemed early, there might be redeemed at a substantial loss. There is a risk that an investor may lose some or all of the value of its investment. Thus the partial principal protection does not apply, if the Notes are redeemed early.

Finally the redemption payment of the Note is dependent upon the Issuer being able to meet its obligation on the Maturity Date. If the Issuer is not able to meet its obligation, investor may lose part of or all of the invested amount.

The Basket of Underlying Equities contain(s) the following underlying(s) (as set out in item 17 of the Final Terms). The description of the companies in the below is taken from Bloomberg. Additional information about the underlyings can be found on the official web-pages of the companies:

2.3 What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

Credit risk: The risk of losses because debtors fail to meet all or part of their payment obligations to the Group. Credit risk includes counterparty credit risk. Counterparty credit risk arises as a combination of credit risk (a deterioration in the creditworthiness of a counterparty) and market risk (the potential value of derivatives contracts). Danske Bank Group takes on counterparty credit risk when it enters into derivatives transactions (interest rate, foreign exchange, equity and credit contracts) and securities-financing transactions.

Market risk: The risk of losses or gains caused by changes in the market values of the Group's financial assets, liabilities and off-balance-sheet items resulting from changes in market prices or rates. Market risk affects the Group's financial statements through the valuation of on-balance-sheet and off-balance-sheet items: some of the Group's financial instruments, assets and liabilities are valued on the basis of market prices, while others are valued on the basis of market prices and valuation models developed by the Group. In addition, net interest income generated through the non-trading portfolio will be affected by the level of interest rates.

Liquidity, funding and capital risk: The risk that the Group has to issue liabilities or own funds at excessive costs, is unable to pursue its business strategy due to balance sheet requirements and restrictions, or the Group ultimately cannot fulfil its payment obligations due to lack of funds. Liquidity risk is the risk that a lack of funding leads to excessive costs or prevents the Group from maintaining its business model or fulfilling its payment obligations. Capital risk is the risk of not having enough capital to cover all material risks arising from the Group's chosen business strategy.

Insurance and pension risk: Danske Bank Group's insurance and pension risk consists of the risks originating from its ownership of Danica Pension. This includes market risk, life insurance risk and operational risk. As part of its product offerings, Danica Pension provides guaranteed life annuities; insurance against death, disability and accident; and cover against adverse investment returns. This exposes the Group to underwriting risks such as longevity and disability risks as well as to market risk. Underwriting risk is the risk of losses from the insurance business. At Danica Pension, these risks are almost exclusively life insurance risks, and they arise naturally out of the business model. Most underwriting risks materialise over long time horizons during which the gradual changes in biometric conditions deviate from those assumed in contract pricing.

Non-financial risk: The risk of financial losses or gains, regulatory impact, reputational impact or customer impact resulting from inadequate or failed internal processes or from people, systems or external events, including legal and compliance risks. Non-financial risk consists of operational risk, financial crime risk, conduct risk, technology risk, model risk as well as financial control and strategic risk.

3. KEY INFORMATION ON THE SECURITIES

3.1 *What are the main features of the securities?*

The Rights attached to the Notes

The return on the Notes is linked to the credit risk and the financial obligations of the underlying Reference Entity (which shall include any Successors thereof). The creditworthiness of the Reference Entity may go down as well as up throughout the life of the Notes. Fluctuations in the credit spreads of the Reference Entity will affect the value of the Notes.

The Adjusted Calculation Amount will be adjusted based on the number of Credit Events. If 9 or less credit events occur the Adjusted Calculation Amount will be equal to the original Calculation Amount. For each Credit Event above 9 the Adjusted Calculation Amount will be lowered by 1/9 meaning that at 18 or more Credit Events the Adjusted Calculation Amount will be equal to 0% (zero). In a worst case scenario where 18 or more Reference Entities experience a Credit Event during the first Interest Period, the Final Redemption Amount will be zero and the investor will lose all of the invested amount.

The return on the Notes is also equity-linked, as the investor is exposed to the development of the Underlying Equities. The notes are a complex financial product with potentially full down side risk.

The performance is determined as the weighted average performance of the Basket of Underlying Equities, multiplied with the Participation Rate of INDICATIVELY 160% per cent (*to be determined no later than on the Issue Date, subject to a minimum of 150 per cent.*).

If the weighted average performance of the Basket of Underlying Equities is positive, the Notes will redeem at a price above par.

If the weighted average performance is negative, the Notes will redeem at par.

The market value of the Notes during their term may fluctuate and if the Notes are sold in the secondary market prior to maturity they might have to be sold at a substantial loss. Investors should therefore be willing to hold the Notes to maturity. Investors cannot be certain that there will be a secondary market for the Notes and the Notes are not expected to be traded every day. Even if such a market did exist, there is no assurance that the market would operate efficiently, or that the price of the Notes would reflect a theoretical or fair price.

If the Issuer is obliged to redeem the Notes early, due to change in Tax or Legal aspects prohibiting the Notes, or in the event of the Issuer defaulting on its debt, the Notes may be redeemed in accordance with the Conditions at their Early Redemption Amount (see item 32 of the Final Terms). If the Notes are redeemed early, there might be redeemed at a substantial loss. There is a risk that an investor may lose some or all of the value of its investment. Thus the partial principal protection does not apply, if the Notes are redeemed early.

Finally the redemption payment of the Note is dependent upon the Issuer being able to meet its obligation on the Maturity Date. If the Issuer is not able to meet its obligation, investor may lose part of or all of the invested amount.

Under the terms of the Notes, certain dates may be adjusted if the date specified is either not a business day or not a trading day. Any adjustments may affect the return (if any) you receive. The terms of the Notes also provide that if certain exceptional events occur (1) adjustments may be made to the Notes and/or (2) the Issuer may terminate the Notes early. These events principally relate to the Basket of Underlying Equities, the Notes and the Issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Ratings: The Issuer has been rated by each of S&P Global Ratings Europe Limited (“**S&P**”), Fitch Ratings Limited (“**Fitch**”), and Moody’s Investors Service Limited (“**Moody’s**”) as follows:

long-term Issuer default rating	S&P: A	Fitch: A	Moody's: A3
short-term Issuer default rating	S&P: A-1	Fitch: F1	Moody's: P-2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Transferability of the Notes: There are no restrictions on the free transferability of the Notes, subject to the offering and selling restrictions of the United States, the EEA, the United Kingdom, Germany, Denmark, Finland, Norway and Sweden and the laws of any jurisdiction in which the Notes are offered or sold.

Status (Ranking): This Series of Notes is issued on a senior basis. The Notes will constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will rank pari passu without any preference among themselves and at least pari passu with all other ordinary, non-preferred, unsubordinated and unsecured obligations of the Issuer, present and future save for certain mandatory exceptions provided by law. Holders of the Notes may be subject to write-down or conversion into equity on any application of the general bail-in tool under EU Directive 2014/59/EU (“**BRRD**”) which may result in holders losing some or all of their investment.

Taxation: The Issuer shall not be liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, presentation and surrender for payment of any Note and all payments made by the Issuer shall be made subject to any tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.

Negative pledge and cross default: The terms of the Notes will not have the benefit of a negative pledge or a cross-default.

Events of default: The terms of the Notes will contain, amongst others, the following events of default and following any such event the Notes will be repayable at their early redemption amount: (i) default in payment of any principal or interest due in respect of the Notes, continuing for a period of 5 days after the date on which notice has been given to the Issuer; (ii) default in the performance or observance of any other obligation of the Issuer under the Notes and such default remains unremedied for 30 days after notice requiring remedy has been given to the Issuer; (iii) a legal process is levied or enforced or sued out upon or against any part of the assets of the Issuer which is material in its effect upon the operation of the Issuer and is not discharged or stayed within 60 days of having been so levied, enforced or sued out, (iv) events relating to the bankruptcy of the Issuer; and (v) the Danish Financial Supervisory Authority files a petition for the suspension of payments of the Issuer.

Meetings: The terms of the Notes will contain provisions for calling meetings of holders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Governing Law: English law, except that the registration of the Notes in Euroclear Finland Oy shall be governed by Finnish law.

Representative of holders: Not Applicable – no representative of Noteholders has been appointed by the Issuer.

3.2 Where will the securities be traded?

Application will be made by the Issuer (or on its behalf) for the Notes to be admitted to trading on the regulated market of the Euronext Dublin.

3.3 What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Liquidity and secondary market risk: the Notes may have no established trading market when issued, and one may never develop. Investors may not be able to sell their Notes easily or at a price greater than the amount invested.

Risk of losing all or some of the investment: many factors are likely to affect the value of and return on the Notes, including interest rates, exchange rates, performance of the reference items and economic, financial and political factors.

The Notes may be modified: the terms of the Notes may be modified without the consent of the investor in certain circumstances. This will not always require the decision of a meeting of investors.

Exchange rate risks: exchange rate movements may adversely impact an investor where the Notes are not denominated in the investor's own currency and the imposition of exchange controls could result in an investor not receiving payment on the Notes.

Risk of adjustment or early redemption following a disruption or additional disruption event: in this case any adjustments made or an early redemption of the Notes at the early redemption amount may not be a favourable outcome for investors.

Credit risk of each Reference Entity: investors are exposed to a credit event in relation to each Reference Entity. If a credit event occurs investors may lose some or all of the value of their investment.

Risk of Reference Entity replacement or succession: A Reference Entity may be replaced in certain circumstances. This may increase in the credit risk involved for the investors.

Risk of volatility: movements in the price of the basket of equity securities may be subject to significant fluctuations. The timing of this may adversely affect the return to investors, even if the average level is consistent with their expectations.

Risks relating to benchmarks: the regulation and reform of benchmarks may adversely affect the value of the Notes as they are linked to or reference such a benchmark.

Investors have no claim against the reference item: investors are exposed to the performance of the relevant reference item but will have no recourse to such reference item or to the issuer or sponsor of the reference item.

2.3 Vilka nyckelrisker är specifika för Emittenten?

Emittenten är utsatt för följande nyckelrisker:

Kreditrisk: Risken för förluster orsakat av att gäldenärer inte uppfyller hela eller delar av sina betalningsförpliktelser gentemot Koncernen. Kreditrisk inkluderar motpartskreditrisk. Motpartskreditrisk uppkommer genom en kombination av kreditrisk (en försäkring av motpartens kreditvärdighet) och marknadsrisk (det potentiella värdet av derivatkontrakt). Danske Bank Group tar på sig motpartskreditrisk när den ingår derivattransaktioner (ränte-, valuta-, aktie och kreditkontrakt) och värdepappersfinansieringstransaktioner.

Marknadsrisk: Risken för förluster eller vinster orsakade av förändringar i marknadsvärden för Koncernens finansiella tillgångar, skulder och poster utanför balansräkningen till följd av förändringar i marknadspriser eller kurser. Marknadsrisk påverkar Koncernens finansiella rapporter genom värderingen av poster upptagna på balansräkningen och poster utanför balansräkningen: vissa av Koncernens finansiella instrument, tillgångar och skulder är värderade efter marknadspriser, medan andra är värderade efter marknadspriser och värderingsmodeller utvecklade inom Koncernen. Utöver detta kommer nettointäkter genererade från den icke-handlade portföljen att påverkas av räntenivåerna.

Likviditets-, finansierings- och kapitalrisk: Risken för att Koncernen måste emittera skulder eller eget kapital till betydande kostnader, inte kan följa sin affärsstrategi på grund av balansräkningskrav och begränsningar, eller att Koncernen inte kan uppfylla sina betalningsförpliktelser på grund av brist på medel. Likviditetsrisk är risken att en frånvaro av finansiering leder till betydande kostnader eller förhindrar Koncernen att upprätthålla dess affärsmodell eller fullgöra sina betalningsåtaganden. Kapitalrisk är risken för att inte ha tillräckligt med kapital för att täcka materiella risker uppkomna genom Koncernens valda affärsstrategi.

Försäkrings- och pensionsrisk: Danske Bank-Koncernens försäkrings- och pensionsrisk består av de risker som härrör från ägandet av Danica Pension. Detta inkluderar marknadsrisk, livförsäkringsrisk och operativ risk. Som en del i dess produkt erbjudanden tillhandahåller Danica Pension garanterad livränta; försäkring mot döden, invaliditet och olycka; och täcker negativa investeringsavkastningar. Detta exponerar Koncernen mot försäkringsrisker så som livfallrisker och invaliditetsrisker såväl som marknadsrisk. Försäkringsrisker är risken för förluster inom försäkringsverksamheten. På Danica Pension är dessa risker nästan enbart livförsäkringsrisker, och de framträder naturligt som en följd av affärsmodellen. De flesta försäkringsriskerna materialiseras över långa tidshorisonter genom vilka gradvisa förändringar i biometriska tillstånd avviker från de förväntade i prissättningen av avtalen.

Icke-finansiell risk: Risken för ekonomiska förluster eller vinster, inverkan av lagstiftning, påverkan på renommé eller kundpåverkan till följd av otillräckliga eller misslyckade interna processer eller från personer, system eller externa händelser, inklusive juridiska- och regelefterlevnadsrisker. Icke-finansiella risker består av verksamhetsrisk, ekonomisk brottslighetsrisk, uppföranderisk, teknologisk, affärsmodellrisk såväl som finansiell kontrollrisk och strategisk.

3. NYCKELINFORMATION OM VÄRDEPAPPAREN

3.1 Vilka är värdepapperens viktigaste egenskaper?

Rättigheter tillkommande Obligationerna

Obligationernas avkastning är kopplad till referensobjektets (vilket inkluderar alla eventuella efterträdare) kreditrisk och dess finansiella åtaganden. Referensobjektets kreditvärdighet kan sjunka såväl som höjas under obligationernas livscykel. Fluktuationer i referensobjektets kreditspreadar kommer att påverka värdet på obligationerna.

Det justerade kalkyleringsbeloppet kommer att justeras i förhållande till antalet kredithändelser. Inträffar 9 eller färre kredithändelser kommer det justerade kalkyleringsbeloppet att vara lika med det ursprungliga kalkyleringsbeloppet. Inträffar fler än 9 kredithändelser kommer det justerade kalkyleringsbeloppet att nedsättas med 1/9, vilket innebär att 18 eller flera kredithändelser kommer att medföra att det justerade kalkyleringsbeloppet kommer att vara lika med 0% (noll). För det fall fler än 18 referensentiteter blir föremål för en kredithändelse under den första ränteperioden, kommer det slutliga återbetalningsbeloppet att bli noll och investeraren kommer att förlora hela sin investering.

Obligationernas avkastning är också kopplad till utvecklingen av Korg med underliggande aktier. Obligationerna är en komplex finansiell produkt och i värsta tänkbara scenario kan investeraren förlora hela det investerade beloppet.

Utvecklingen bestäms som den viktade genomsnittliga utvecklingen av Korg med underliggande aktier, multiplicerat med deltagandegraden INDIKATIVT 160% procent (*bestäms av Emittenten senast på Emissionsdagen, minst 150 procent.*).

För det fall den viktade genomsnittliga utvecklingen av Korg med underliggande aktier, är positiv löses obligationerna in till ett pris överstigande par.

För det fall den viktade genomsnittliga utvecklingen är negativ löses obligationerna in till par.

Marknadsvärdet av obligationerna under dess löptid kan fluktuera och för det fall obligationerna säljs på andrahandsmarknaden innan förfall kan de tvingas försälas till en påtaglig förlust. Investerare bör därför vara villiga att äga obligationerna fram till förfall. Investerare kan inte vara säkra på att det kommer att finnas en andrahandsmarknad för obligationerna och obligationerna förväntas inte handlas varje dag. Även ifall en sådan marknad skulle existera är det inte säkert att marknaden skulle vara effektiv eller att priset för obligationerna skulle motsvara ett teoretiskt eller rättvist pris.

För det fall emittenten är skyldig att lösa in obligationerna i förtid, föranlett av förändringar av skattemässiga eller legala aspekter vilka skulle göra obligationerna otillåtna, eller för det fall emittenten underlåter att betala på sina skulder i tid, kan obligationerna lösas in i enlighet med villkoren till dess förtida inlösenbelopp (se punkt 32 i slutliga villkoren). För det fall obligationerna lösas in i förtid föreligger en risk att de lösas in till en påtaglig förlust. Investerare riskerar att förlora hela eller delar av sin investering. Följaktligen tillämpas inte det partiella kapitalskyddet för det fall obligationerna lösas in i förtid.

Slutligen är betalningen för inlösen av obligationerna avhängig av att emittenten har möjlighet att fullfölja dess skyldighet på förfalldagen. För det fall emittenten inte har möjlighet att fullfölja dess skyldighet kan investeraren förlora hela eller delar av det investerade beloppet.

Enligt villkoren för Obligationerna kan vissa datum ändras för det fall det specificerade datumet antingen inte är en arbetsdag eller handelsdag. Andra justeringar kan påverka avkastningen (om någon) som du mottar. Villkoren för Obligationerna anger även att för det fall extraordinära händelser inträffar (1) kan justeringar av Obligationerna göras och/eller (2) kan Emittenten avbryta Obligationerna i förtid. Dessa händelser hänför sig till Korgen med underliggande aktier, Obligationerna och Emittenten. Avkastningen (om någon) som du mottar på sådant förtida avbrott kommer troligtvis avvika från de scenarier som beskrivs ovan och kan bli mindre än beloppet som du investerade.

Värderingar: Emittenten har kreditvärderats av var och en av S&P Global Ratings Europe Limited ("**S&P**"), Fitch Ratings Limited ("**Fitch**") och Moody's Investors Service Limited ("**Moody's**") enligt följande:

Emittentens långsiktiga fallissemangsbetyg	S&P: A	Fitch: A	Moody's: A3
Emittentens kortsiktiga fallissemangsbetyg	S&P: A-1	Fitch: F1	Moody's: P-2

Ett kreditvärdighetsbetyg för ett värdepapper utgör inte en rekommendation att köpa, sälja eller inneha värdepapper och kan bli föremål för suspendering, sänkning eller tillbakadragande vid vilken tidpunkt som helst av det tilldelande kreditvärderingsinstitutet.

Obligationernas överlåtbarhet: Det finns inga begränsningar avseende Obligationernas fria överlåtbarhet, med förbehåll för begränsningar av erbjudanden och försäljning i USA, EES, Storbritannien, Tyskland, Danmark, Finland, Norge och Sverige och lagarna i alla jurisdiktioner där Obligationerna erbjuds eller säljs.

Status (Rangordning): Denna Serie av Värdepapper emitteras på en oprioriterad basis. Obligationerna kommer utgöra direkta, ovillkorade, icke säkerställda och icke efterställda förpliktelser för Emittenten och kommer att rangordnas lika sinsemellan (pari passu) och åtminstone lika (pari passu) med alla andra vanliga, icke-prioriterade, icke säkerställda och icke efterställda förpliktelser för Emittenten, med reservation för vissa lagstadgade obligatoriska undantag. Innehavare av Obligationer kan bli föremål för nedskrivning eller konvertering till eget kapital vid tillämpning av det allmänna nedskrivningsverktyget enligt EU-direktiv 2014/59 / EU ("**BRRD**") vilket kan leda till att innehavare förlorar en del av eller hela sin investering.

Beskattning: Emittenten är inte ansvarig för eller på annat sätt skyldig att betala någon skatt, tull, källskatt eller annan betalning som kan uppstå till följd av ägande, överlåtelse, presentation och överlämnande för betalning av någon Obligation och alla betalningar gjorda av Emittenten ska vara föremål för eventuell skatt, tull, källskatt eller annan betalning som kan krävas att genomföras, betalas, innehållas eller dras av.

Negativutfästelse om annan pant och korsvis uppsägningsgrund: Villkoren för Obligationerna kommer inte omfattas av en negativutfästelse om annan pantsättning eller korsvis uppsägningsgrund.

Uppsägningsgrundande händelser: Villkoren för Obligationerna kommer att innehålla bland annat följande uppsägningsgrundande händelser och efter alla sådana händelser kommer Obligationerna att återbetalas till dessas förtida inlösenbelopp: (i) underlåtenhet att betala av eventuell(t) kapitalbelopp eller ränta som är förfallen med avseende på Obligationerna och sådan underlåtenhet varar under en period om fem dagar efter det datum då meddelande har lämnats till Emittenten; (ii) Emittentens underlåtenhet att utföra eller iaktta något av sina andra åtaganden enligt Obligationerna och sådan underlåtenhet fortgår i 30 dagar efter det att Emittenten har mottagit meddelande med krav på rättelse, (iii) ett juridiskt förfarande avseende beskattning eller verkställande eller stämning avseende eller gällande någon del av Emittentens tillgångar företas som är betydande vad gäller dess effekt på Emittentens verksamhet och som inte avslås eller inhiberas inom 60 dagar efter sådant juridiskt förfarande avseende beskattning, verkställande eller stämning, (iv) händelser avseende Emittentens konkurs; och (v) den danska finansiella tillsynsmyndigheten lämnar in en begäran om betalningsinställelse för Emittenten.

Möten: Villkoren för Obligationerna kommer att innehålla bestämmelser för att kalla innehavare till möten för att överväga frågor som påverkar deras intressen generellt. Dessa bestämmelser tillåter definierade majoriteter att binda samtliga innehavare, inklusive innehavare som inte närvarade och röstade vid det relevanta mötet och innehavare som röstade på ett annat sätt än majoriteten.

Tillämplig lag: Engelsk rätt, med undantag för registrering av Obligationerna sker i Euroclear Finland Oy, då ska värdepapperen vara underkastade finsk rätt.

Representation av innehavare: Ej tillämpligt – ingen representant för Obligationsinnehavarna har utsetts av Emittenten.

3.2 Var kommer värdepapperen att handlas?

Ansökan har gjorts av Emittenten (eller för dess räkning) för att ta upp Obligationerna till handel på den reglerade marknaden Euronext Dublin.

3.3 Vilka nyckelrisker är specifika för värdepapperen?

Riskerna som är förknippade med Obligationerna är följande:

Likviditets- och andrahandsmarknadsrisk: det finns risk för att det inte finns någon andrahandsmarknad för Obligationerna när dessa emitteras och det är möjligt att en sådan aldrig utvecklas. Det är möjligt att investerare inte på ett enkelt sätt eller till ett pris högre än det investerade kommer att kunna sälja sina Obligationer.

Risk att förlora hela eller delar av investeringen: många faktorer kommer sannolikt att påverka värdet och avkastningen av Obligationen, däribland inkluderat ränta, valutaväxlingskurser, utveckling av referensobjekt och ekonomiska, finansiella och politiska faktorer.

Obligationerna kan ändras: villkoren för Obligationerna kan i vissa fall ändras utan investerarens godkännande. En sådan ändring kommer inte alltid att fordra beslut genom innehavarmöte.

Valutakursrisker: valutakursrörelser kan påverka en investerare negativt där Obligationerna inte är denominerade i investerarens egen valuta och införandet av valutakontroller kan leda till att en investerare inte får betalning på dessa Obligationer.

Risken för justering eller förtida inlösen som följer en avbrottshändelse eller ytterligare avbrottshändelse: i detta fall ska alla justeringar gjorda, eller en förtida inlösen av Obligationerna för det förtida inlösenbeloppet, inte resultera i något gynnsamt resultat för investerare.

Kreditrisken för varje Referensobjekt: investerare exponeras mot en kredithändelse avseende varje Referensobjekt. För det fall en kredithändelse inträffar kan investerare förlora en del eller hela värdet av deras investering.

Risken för Referensobjektets ersättande eller succession: Ett referensobjekt kan komma att ersättas i vissa fall. Detta kan öka investerarnas kreditrisk.

Volatilitetsrisk: rörelser i priset för korgen av aktier kan bli föremål för betydande fluktuationer. Timingen för dessa rörelser kan negativt påverka avkastningen till investerare, även ifall den genomsnittliga nivån är konsekvent med dess förväntningar.

Risker relaterade till referensvärden: regleringen och reformen av "referensvärden" kan påverka Obligationernas värde negativt eftersom de är relaterade till eller refererar till sådana "referensvärden".

Investerare har inga rättigheter gentemot referensobjektet: investerare är exponerade mot utvecklingen av relevant referensobjekt men kommer inte ha någon regressrätt mot sådant referensobjekt eller gentemot emittenten eller sponsorn av referensobjektet.
